Stampede Photography

Throughout most Stampede activities, the Stampede Photography and Communications teams will be capturing photos and videos of the Stampede membership. In addition, student leadership may take photos of specific sections. Every effort will be made to ensure all members are included in these images.

All photos taken by the Stampede Photography team are eligible for posting to the Stampede social media sites, the Stampede website, as well as used in the Stampede Score at the end of the year. Every effort is made to be fair in the selection of photos for both social media and The Score. The Photography and Communications teams will review all photos and videos for quality and appropriate use, with consideration given to the age and maturity of the students in the Stampede. At times, various organizations or individuals may share content related to the Stampede on social media. While we appreciate the interest, please note that we do not control external sharing by those who follow our official social media channels.

The Photography/Communications teams are parent volunteers that will do their best to ensure every section is highlighted during the marching season. The volunteers of the photography and communications teams are not employed by the school district and therefore are not liable for any omissions, misrepresentations, or misunderstandings that may arise from the use or selection of images and content.

We understand that some families may have concerns about the use of their child's photo in Stampede media. Please know that we take these concerns seriously and are committed to being respectful and thoughtful in how photos and videos are used. If you have any specific concerns or questions, we encourage you to reach out to the VP of Functions at vpevents@lakebeltonhsband.com. Our goal is not to exclude students from being captured in the memories of the year, but to work with families to find a solution that respects their wishes while still allowing their child to be a part of the Stampede experience.
